

criticism for enactment of the soybean legislation. The wheat legislation has worked over the years but that was done by the wheat growers but it is awfully easy to sit back and criticize and condemn and complain. It is much more difficult to promote and enact something that is worthwhile. I predict that by the time you get done you are going to have a program which is going to serve only one purpose, that purpose is going to be that the individuals involved in the corn program are going to have to spend most of their time and money lobbying with the money they have for the continuation of the program. Now I know that is how it is going to be. You can say it isn't but it is going to work that way, because if it doesn't, it is going to go out of existence.

SENATOR MARVEL: Thirty seconds.

SENATOR SCHMIT: If my neighbor down the road gets his money back and the neighbor across the road gets his money back, next year I will get my money back. Now you either want something or you don't want something, but if you want something hard enough to fight for it, then do so and don't belly up every time somebody who has got a paid position comes in and tries to get you to tuck your tail between your legs and run for cover, because when the chips are down and the smoke clears, you are going to be standing right out there again holding an empty blank check with no signature on it.

SENATOR MARVEL: Time is up. Question has been called for. The motion will be, cease debate. Are you in favor of ceasing debate, vote aye, opposed vote no. The motion is to cease debate. I vote aye.

CLERK: Senator Marvel voting aye.

SENATOR MARVEL: Record.

CLERK: 29 ayes, 1 nay to cease debate, Mr. President.

SENATOR MARVEL: Okay, we are back to, this is Senator Lamb's amendment, isn't it?

CLERK: Senator Richard Lewis'.

SENATOR MARVEL: Senator Lewis, I recognize you for the purpose of closing on your amendment.

SENATOR R. LEWIS: Mr. President, members of the Legislature, I think that probably enough has been said. I see no reason to belabor the point. I would like to just point out one thing, however. It takes about, based on the soybean experience, about \$5 to process a refund. Now the people who are sponsoring all of this part of the program are asking for a referendum, a refund. I think they are trying to cripple the program. If these people are sincerely interested in coming up with a program that will develop markets, that will develop research, then I think they better pay some attention to how this program is going to be financed. I would urge you to support this amendment.

SENATOR MARVEL: Do you want to read the amendment again and then we will vote on the adoption?
